Product Name

Tomato Paste

Product General Information:

Tomato paste is a thick paste made by cooking tomatoes for several hours to reduce the water content, straining out the seeds and skins, and cooking the liquid again to reduce the base to a thick, rich concentrate. It is used to impart an intense tomato flavour to a variety of dishes, such as pasta, soups and braised meat.

Food values:

Just a tablespoon of tomato paste is a good source of antioxidants and has 3 to 6 percent of your recommended daily value of iron, potassium and B vitamins.

Intended end use:

Tomato paste is used to inexpensively thicken, color, and enrich the flavor of tomato sauces and other semi-liquids such as soups and stews. Be careful not to add too much, which can result in an overpowering tomato flavor or give the sauce too much of an acidic edge

Chemical And Physical Specification

NAME OF PRODUCT:	TOMATO PASTE
KIND OF PRODUCT:	GLASS 800 GR
BATCH NO:	00069
SHELF LIFE:	18 MOUNTHS

ROW	ANALYSIS	RESULT	UNIT	ISIRI STANDARD RANG	ISIRI STANDARD NO.
